48–50 Cannon Street, EC4
A Boddington

NGR: TQ 32425 80960
SMR: 042180–5

Excavations on this small site to the S of Cannon Street located three Roman water channels revetted with timber, probably for drainage rather than for water supply. Numerous postholes were found, mostly associated with the channels, though one group may represent a late Saxon building. Pits of Roman, Saxon, and medieval date were recorded.
